Odoo ERP – Hunar Foundation

About Hunar Foundation

The Hunar Foundation (THF), established in 2008, is a non-profit organization dedicated to empowering marginalized youth in Pakistan through vocational and technical education. With 16 operational institutes and plans for two more, THF offers a range of traditional and digital courses designed to equip students with marketable skills. Their mission is to alleviate poverty by providing quality training that leads to employment or entrepreneurship opportunities. THF aims to graduate over 100,000 students annually by 2025-26, contributing significantly to Pakistan's skilled workforce.

AI Solutions

- AI Voice Agents

AI Voice Agent

Making voice **AI Simple & Accusable**

We offer cutting-edge Voice AI development services designed to help businesses integrate natural, conversational voice interfaces into their products and platforms. Our solutions leverage advanced speech recognition, natural language processing, and machine learning technologies to create intelligent voice assistants, automate customer support, and enhance user experiences across industries. Whether you're building a smart device, virtual assistant, or voice-enabled application, our team delivers scalable, secure, and customizable Voice AI systems tailored to your specific needs.

AI Voice Agent

Making voice **AI Simple & Accusable**

Multilingual	Talk to agents in English, Spanish, Mandarin, or one of 100+ other supported languages.	API-native	Everything is exposed as an API, with 1000s of configurations and integrations.
Automated testing	Design test suites of simulated voice agents to identify hallucination risks before going to production.	Bring your own models	Bring your own API keys for transcription, LLM, or text-to-speech models. Or, plug in your own self-hosted models.
Tool calling	Plug in your APIs as tools to intelligently fetch data and perform actions on your server.	A/B experiments	Test different variations of prompts, voices, and flows to continuously optimize performance.

Managed Staffing Services

IT Staff Augmentation

- With our special process and extensive understanding of business needs for workflow fluctuations and special projects, our IT Staff Augmentation services take care of your IT staffing needs. Through an agile and nimble approach, we help you meet your evolving talent needs with precision and speed at a cost-saving benefit. Whether you're recruiting a small team or an entire department – we have access to pre-validated candidates, available at short notice and able to meet your requirements.

Direct Hire

- We support companies by augmenting a Direct Hire service to their HR function with a full range of direct hiring solutions. Our direct hire team easily partners with organizations of all sizes and delivers best-fit talent across all industries. With an active database of over 1,00,000+ candidates and specialist knowledge of key business verticals, we will provide the best talent for roles across various levels.

Recruitment Process Outsourcing

- For over a decade, we have been providing RPO services to major brands in the Pakistan & UAE Our multilingual team of experts brings tailor-made solutions, irrespective of the size of current operations – to upsize or downscale, to reorganize local, regional, or international hiring at optimized costs. Technology, recruitment, and business process converged together with a reliable support PRO team, has enabled visa processing for multiple resources

Training

- Training is a crucial part of any IT staffing requirements as it defines performance and success. Our training encompasses soft skills, including personality development, technical enhancement, team skills, etc. as well as tech/project specific training. Through the survival of the fittest approach, our training programs will equip you with the right combination of skills to surge ahead of the competition at the workspace.
